Truth is, I can't take the pain no more, my back, my knees -- hell, holding this pen and sittin here hurts like a sonofabitch. you know it ain't getting no better. I got doc Kramer to double up my meds, told him we was going on a trip, and well, you're reading this, so you know, I wasn't lying. Just not the sort of trip he was thinking, or the sort you come back from. So you understand, I know you do, but I'm telling you anyway, you got nothing to do with this, its all on me, you remember that. I love you -- I know I never said it much, but you always knew. Henry

shrinking in the light of your dreams

when you lift your lamp to the night sky
the warmth in my heart becomes stronger
basking in the light of your love

so lift it higher, my light, to the night sky

Mike -

By the time you read this, I'll be gone. I know I
promised to outlive you, but it seems God had other plans
for me. I wish it werent the case -- all I've ever wanted
was to grow old with you -- but who am I to judge our
Lord?

You've been so strong this past year. Having you by my
side made this battle so much easier. You're my warrior,
my Knight. I couldn't have done it without you.

These past 30 years with you have Been a gift. Every
trip, every moment spent made my life beautiful. We may
have hiked trails and climbed mountains, but you were my
greatest adventure.

Be strong, Mike -- I'll see you again. But not too soon!

I love you.

Elizabeth

Kouri - "To Protect and Serve"

A letter from Kouri's family, found in Diamond Lake.

Derrick -- the girls and I want you to know how much we love and miss you. They want to know how you like Wyoming, I know they just talked to you on the phone, but they want something they can read. Stories about what you're doing. I told them you work for the government and can't talk about your work. They don't understand classified, but they know what secret means. And they want pictures, real photos, not cell phones. Dad wants a roll of film he can develop. Mountains and forests. The girls can't wait for us to come out there once school is out, they say they've never seen real mountains. I tell them that Mount Michelle is a real mountain, but they just start groaning. Okay, photos, stories -- not the secret kind -- and don't forget -- I still have that silk teddy you haven't seen. Love, Karie

Weaver - "Look To the Stars"

A letter to Weaver, found on Wizard Island.

Dear James,

Thank you so much for your letter. In all my years as both a chemist and a professor, I cannot express enough how much it means to me to read about the accomplishments and dreams of the next generation.

In regards to your question: yes, it is difficult. Being who we are, with what we want to do, is always a struggle. There are people who won't understand, and those who will treat you poorly because of it, but to limit ourselves and our minds out of fear would be doing ourselves and our field a disservice.

Know that it will be hard, but also know that it will be well worth it.

Don't just reach for the stars -- grab them.

Please let me know if you're ever in New York City. I would love to meet with you and discuss your attached paper. Perhaps even show you around the UNYC campus.

Best Regards,

Dr. Naomi Delilah Thompson

University of New York City Department of Chemistry

Jessie - "They Shall Be of One Mind"

Carlos' RIP manifesto and notes, found in Iron Butte.

I, Jessie Williamson, gave up my name in honor of my shaman, Carlos Louis Dominic, who revealed to me the One Mind, who helped me uncover the state of dream, and taught me the song of the Peyote. Everything can be burned away, everything can be forgotten. The Release has shown us. Get low, brothers and sisters, renounce everything, be one mind, forget everything, and you will become one of the Free. I will be joining you, soon enough, when my work is through. The Rising is coming.
Carlos
